Pro Summary

The Pro Summary dashboard is meant to give a combination of useful KPI's at a glance. There are additional reports available that will go into further detail in any given area if needed.

This dashboard also provides comparative data to the period you select in the date range. In the image below, you can see some basic comparison in the Average Invoice KPI Box. The green up arrow tells you that your Average Invoice is up compared to the previous year. The portion of the KPI Box that says 'Previous:' tells you the comparative Average Invoice from last year.

Additionally, hovering over the up or down arrow in the KPI Box expands on the date ranges in a tooltip.

										and the second of the second o		

Each of the KPI Boxes also has a ? in the upper right corner. Hovering your mouse over this ? makes a tooltip appear giving more information about how the KPI is calculated.

In the screenshot below, hovering over the ? next to Revenue Total tells you information that will help you compare it to Net Total.

In the Profit Summary portions, the topmost rows give you your shops Labor, Material, and Sublet revenue totals. The material row in this portion excludes Tires and Batteryies.

The bottom pair of material rows break out Tire and Battery sales (material only) based on material sales where the PCDB part definition is set to 'Tire' and 'Vehicle Battery is used respectively.

In most cases, the Taxable and Non-Taxable figures are meant to help you catch when taxes are not being applied properly. If any labor, material, or sublet line on an invoice had a single tax applied to them, they will appear as Taxable. If you are in a jurisdiction where multiple taxes can apply to a single line, you should not use the Pro Summary for tax remittances. You should also compare them to the appropriate tax reports in Protractor.

Profit Summary - N	o Tires or Batteries

Lastly, this dashboard can be loaded as long as you have 'view' and 'modify' permissions in your user or role security.

From the main ribbon, click on dashboards. Next, click 'Add' in the vertical stacked dashboard options. In the dropdown menu, select Pro Summary. You must type in a name in the name field, then press ok. Your dashboard should populate after a moment.
